Edward Thibodo, Lead Energy Contracting Officer
Naval Facilities Engineering Command Southwest

Edward Thibodo is Lead Energy Contracting Officer for the Naval Facilities Engineering Command Southwest. He works closely with the utility companies and Navy Facilities on the West Coast to identify, develop, and accomplish energy conservation projects. He has 35 years of acquisition experience and has spent the past 10 years in the energy conservation arena awarding more than $200 million in various energy conservation projects. All of those contracts were awarded using the Utility Energy Service Contract with local utility companies. Mr. Thibodo works closely with utility companies and financial institutions when developing alternative financing for energy programs and procuring resource efficiency managers. He has received recognition on numerous occasions for his efforts in the energy arena, but his most prized award is the Department of Energy’s 2002 Louis R. Harris Jr. Award.
