

Leadership in Sustainability

Kimberly Gray

U.S. General Services Administration
Auburn, Washington

Sustainability

It's not just about energy...

Sustainability Leadership

- Change in business culture
- Change in behavior
- Organizational strategies

Change in Business Culture

- Thinking about the long-term environmental consequences of our decisions
- Re-examine time periods for return on investment
- Emphasis on sustainability in leadership messages

Change in Behavior

- Employee business travel
- Solid waste diversion, recycling and composting
- Daylight and views
- Commute practices
- Employee energy use in offices

Organizational Strategies

- Incorporating sustainable principles into business plans
- Work is what you do – not where you do it
- Space allocation

Sustainability at GSA

- ZEF – Zero Environmental Footprint
- Strategic Sustainability Performance Plan
- “Net-zero energy” buildings beginning in 2020
- Aggressive greenhouse gas reduction goals
- Facilities Green Teams
- Sustainable service and product Acquisition
- Implementation of Energy Star and LEED in our lease acquisitions.

Leadership in the Future

- Supports an environmental footprint that considers future generations
- Views waste as a resource
- Balances the interests of society, the economy and the environment for the benefit of all
