

Wastewater/Water Energy Training Program Program Overview

Session #1

*West Sound Utility District
Port Orchard, Washington*

June 13, 2012

Sponsors

- Bonneville Power Administration
(with Energy Smart Industrial)
- Puget Sound Energy
- Environmental Protection Agency

Program Mission

For Washington water and wastewater districts to gain greater control over and reduce their energy costs through application of energy management systems, energy efficiency processes and renewable energy technologies, while achieving excellent environmental standards.

Session Objective

Understand the basics of building an Energy Management System, including understanding energy bills, setting a baseline and drafting an energy policy; learn about forming an energy team; hear how other utilities have improved energy performance.

Expectations and Structure

- Four on-site sessions; three webinars
(assignments between sessions)

Key Dates

- June 13, 2012 Onsite Session #1—**West Sound Utility District (Port Orchard)**
- September 6, 2012 Webinar Session #2
- October 11, 2012 Onsite Session #3—**LOTT Clean Water Alliance (Olympia)**
- ~~December 6, 2012~~ November 29, 2012 Webinar Session #4
- January 31, 2013 Onsite Session #5—Location Pending
- March 14, 2013 Session #6
- June 6, 2013 Onsite Session #7—Location Pending

Expectations and Structure

(continued)

- Conference call-ins—Dates Pending
- On-site and phone check-ins
- Progress Tracking
- Summary Report (Master Report)
 - Energy Management Policy (see samples)
- Program Web Page

Feedback

1. What worked for you in this opening session?
2. What would you like to see improved upon/suggestions?
3. What one specific technical thing would you like to learn more about that will benefit you the most?
