WASHINGTON STATE UNIVERSITY

## Clean Buildings – Getting to Efficiency

### *A four-part webinar series*

*WSU Energy Program no-cost webinars for Resource Conservation Managers, Energy Managers, and Sustainability Managers at public facilities in Washington State (others welcome to attend as space allows)*

Operations & maintenance (O&M) and energy management plans (EMP) required for the Washington State Clean Buildings Performance Standard (CBPS) are the focus of this four-part webinar series hosted by the Washington State University Energy Program and presented by Katherine Morgan and Neil Bavins, BOC instructors. While much attention is given to the pathways of compliance for CBPS, this series explores the CBSP requirements of developing EMP and O&M plans, as well as beginning to reduce building energy use.

Each webinar has up to an hour of presentations and a half hour for Q&A. Please register for each separately.

**NOTE: Attendance is limited.**

<p><b>Efficiency through the Clean Buildings Performance Standard</b></p> <ul style="list-style-type: none"><li><b>March 30, 12:00-1:30 Pacific</b></li></ul> <p>Gain an understanding of how to use the CBPS and ASHRAE 100 Standard, on which the CBPS is based. Components of the CBPS, including various roles will be discussed. Building Tune Ups as a beginning strategy will be introduced, and explored more fully in the next webinar.</p> <p><a href="#">Register for Webinar 1</a></p>	<p><b>Tune Ups for Clean Buildings</b></p> <ul style="list-style-type: none"><li><b>April 21, 11:30 am to 1:00 pm Pacific</b></li></ul> <p>Building Tune Ups are a great strategy to prepare for compliance with the energy management plan and O&amp;M plan sections of the CBPS, and at the same time start reducing energy use. Attendees will walk through a Tune Up process, and detailed attention will be given to finding efficiency measures in building systems.</p> <p><a href="#">Register for Webinar 2</a></p>
<p><b>Energy Management Plans for Clean Buildings</b></p> <ul style="list-style-type: none"><li><b>May 19, 11:30 am – 1:00 pm Pacific</b></li></ul> <p>A requirement for compliance with the CBPS is to develop and maintain an Energy Management Plan (EMP). The components of an EMP, and how to develop such an EMP, will be examined, including training, capital management plans, and schedules.</p> <p><a href="#">Register for Webinar 3</a></p>	<p><b>O&amp;M for Clean Buildings</b></p> <ul style="list-style-type: none"><li><b>June 9, 11:30 am – 1:00 pm Pacific</b></li></ul> <p>Learn about what must be included in the O&amp;M plan, as required by the CBPS. Elements such as inventory, performance objectives, and O&amp;M tasks will be explored, as well as a more detailed look into O&amp;M measures for HVAC.</p> <p><a href="#">Register for Webinar 4</a></p>
