

Energy Program

WASHINGTON STATE UNIVERSITY

Home Energy Rater Training August 2022

The Washington State University (WSU) Energy Program, a RESNET® certified provider, is offering a HERS class for prospective home energy raters. HERS is a nationally-recognized rating certification program and it is a prerequisite for the U.S. Environmental Protection Agency (EPA) ENERGY STAR®, Indoor airPLUS®, and other certification programs. Read more about HERS Rater requirements at <https://www.resnet.us/raters/hers-raters/become-rater/>

Topics covered include:

- Fundamentals of residential building science
- RESNET® standards and procedures
- Floor plan take offs and calculators
- Use of REM/Rate® and Ekotrope® modeling tools
- Diagnostic tools and testing
- Introduction to applicable software
- An overview of the many home energy certification programs available for certified raters so that they can consider offering more options to their clients.

The training will include:

Virtual class split into two mandatory session blocks, hosted by the WSU Energy Program August 15-17 AND August 22- 24 ; a computer with REM/Rate® (PC only) or Ekotrope is required (free trial subscriptions are available for this). Classes will be 8AM-4PM Pacific Time.

Cost: \$1,200 paid in advance

- Please note training class fees do not include additional testing nor probationary QAs required by RESNET. Please contact us for additional details.
