

WASHINGTON STATE UNIVERSITY  
**Energy Program**

# Meeting Your Clean Buildings Requirements: EMP and O&M Program Guidance

---

WSU Energy Program  
Resource Conservation Management  
March 20, 2024

# Zoom Housekeeping

---

- This webinar is being recorded.
- All attendees are muted.
- To ask questions, use the chat or “raise your hand” to speak. Someone will unmute you.
- If you are experiencing any technical issues, please call 360-956-2224 for help. Please note our limited capacity to address issues while the webinar is running.

# WSU Energy Program

---

- Self-supporting department within Washington State University based in Olympia
- This presentation part of the Resource Conservation Management (RCM) Program
- Other programs: community solar, Washington state energy codes (residential) support, green transportation education and outreach, community energy efficiency, workforce development, and more

<https://www.energy.wsu.edu>

# Resource Conservation Management Program

---

- RCM support and workforce development
- Public agencies in Washington State
- Provides
  - Monthly newsletter
  - Webinars
  - Publications
  - Technical assistance
  - RCM position announcements & promotion

To receive the newsletter, send email to [rcm@energy.wsu.edu](mailto:rcm@energy.wsu.edu)

*\* Must perform RCM work at public agencies in Washington State \**

# Mark Your Calendars

## Coming next from RCM WSU Energy Program

---

### RCM Summit

~~April 17, 2024, 12:00 to 3:00 PM Pacific Time~~ → Changed to May 7  
via Zoom

- Follow-up discussion to EMP and O&M Program guidance
- Presentation on electric vehicle planning for RCMs
- Washington State RCM networking

### Webinar – RCMs and Occupant Behavior (formal title TBD)

June 5, 2024, 12:00 to 1:00 PM Pacific Time  
via Zoom

# WA Dept. of Commerce – Clean Buildings

---

- Clean Buildings Performance Standard homepage  
<https://www.commerce.wa.gov/growing-the-economy/energy/buildings/>
- CBPS Document Library  
<https://www.commerce.wa.gov/growing-the-economy/energy/buildings-archive-page/clean-buildings-performance-standard-document-library/>
- Support and Resources  
<https://www.commerce.wa.gov/growing-the-economy/energy/buildings/support-and-resources/>

This project was supported in part by Grant No. DE-EE0009488 awarded by the U.S. Department of Energy. Points of view in this presentation are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Energy.

Grant funds are administered by the Energy Program,  
Washington State Department of Commerce

# Meeting Your Clean Buildings Requirements: EMP and O&M Program Guidance

---

Katherine Morgan  
March 20, 2024

# Agenda

---

## Introduction

- Who am I and who is here
- Quick overview of CBPS and what are we covering today

## Purpose and Approach

- CBPS in general
- Energy Management Plan (EMP) and O&M Program and Documentation
- Getting started

## Walkthrough of EMP Template package

- What is included
- Organizing your portfolio and property documents
- Discussion on specific content sections and implementation

## Discussion

- Please use the chat and feel free to reply to others during presentation part and we'll facilitate a discussion after that
- Topics we don't get to can be carried forward to the Summit in April

# Introduction

---

## Katherine Morgan

- Principal at ArchEcology
- Seattle Building Tune-up Specialist
- Former Resource Conservation Manager (RCM)
- LEED AP O+M, BOC Level 2/CBO
- 'Qualified Person'
- BOC (Building Operator Certification) Instructor and Course Manager

# Webinar Objectives

---

REVIEW THE  
TIMELINE,  
IMPLEMENTATION  
AND  
DOCUMENTATION  
REQUIREMENTS OF  
THE STANDARD

PRESENT A VISUAL  
EXAMPLE AND  
TOOLS TO GET  
STARTED

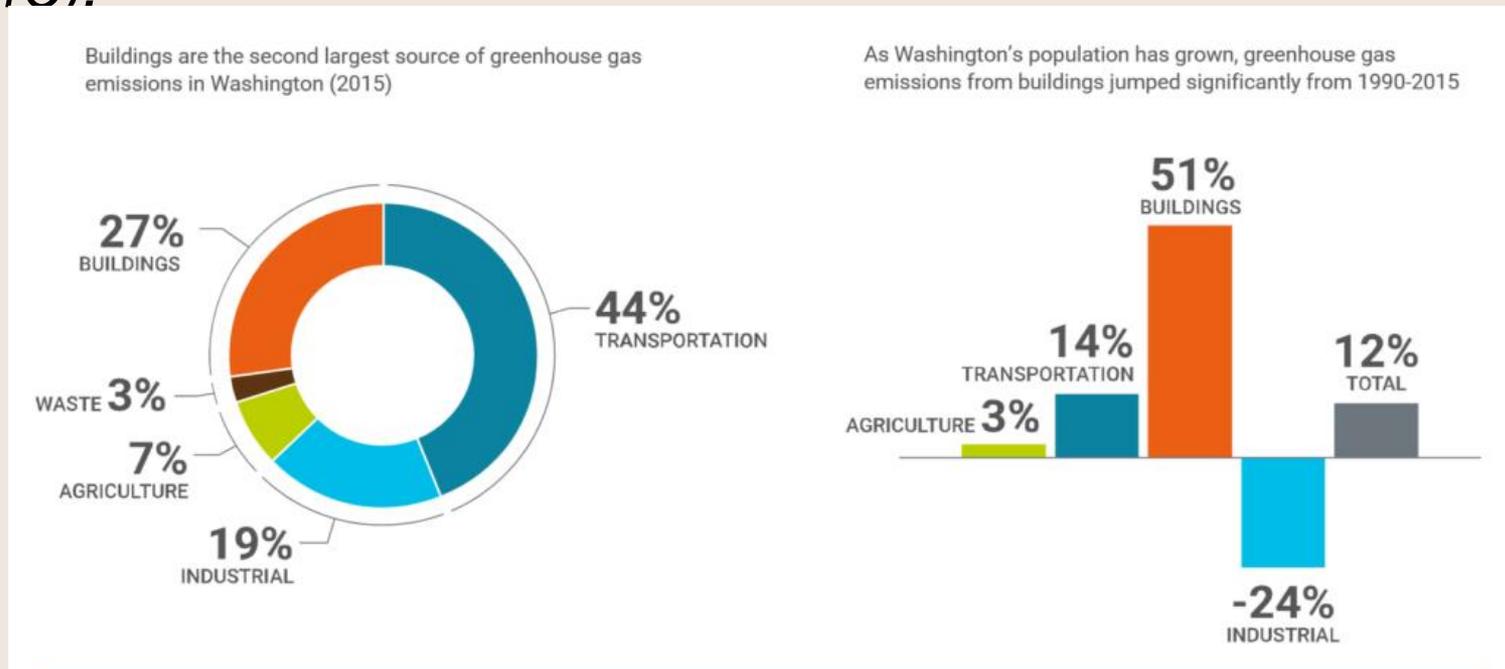

PROVIDE AN  
OPPORTUNITY TO  
DISCUSS  
APPROACHES AND  
CHALLENGES

# Intent of the legislation

*The intent of this law is to reduce energy use and associated greenhouse gas emissions from the buildings sector, which is estimated at 27% of statewide emissions.*

*It is the second biggest 'source' behind transportation....and it is growing (51% increase from 1990-2015).*

# Clean Buildings Performance Standard

---

## The WA CBPS:

Enacted through House  
Bill 1257

ASHRAE 100-2018,  
Energy Efficiency in  
Existing Buildings  
'as amended' ...twice

Published as Washington  
Administrative Code  
194-50

## Tier 1

**Buildings:** commercial  
buildings larger than  
50,000 SF

Established EUI Targets

## Tier 2

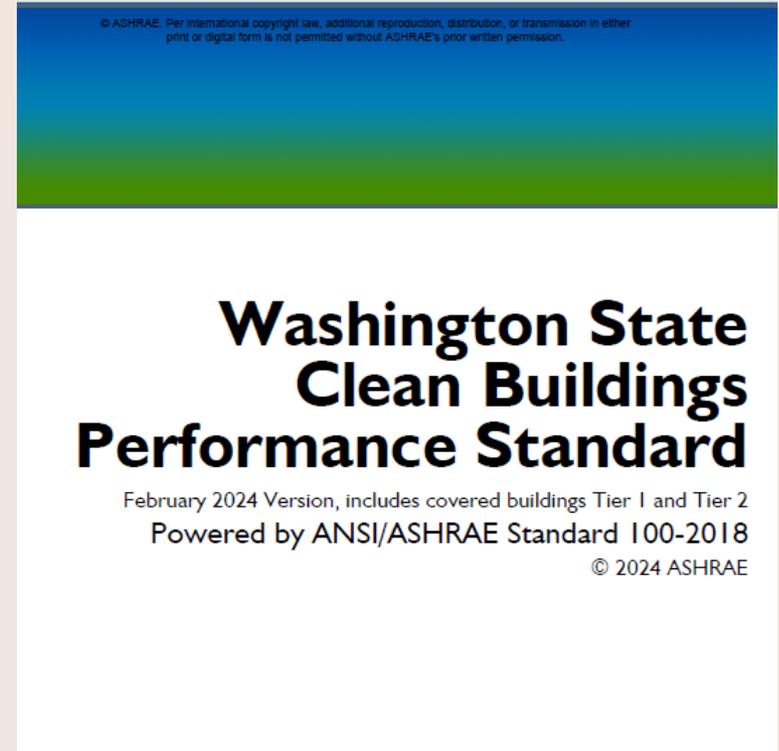

**Buildings:** commercial down to  
20,000 sf and all  
multifamily

# Basic Requirements

---

1. Benchmark building energy use and for Tier 1 (>50,000) *meet* target EUI
2. Develop and maintain a *formal program* to support continuous improvement, including documentation - the Energy Management Plan and Operations & Maintenance Program
3. Take actions to maintain and improve building performance over time

Section and Annex references in slides and template instructions refer to this e.g. O&M Objectives (performance, condition) L2.2.1 is Annex L paragraph 2.2.1.

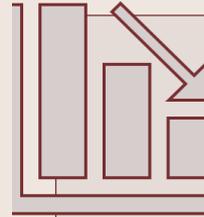

# Benefits of EMP/O&M Program

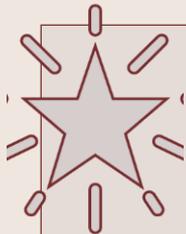

---

Comply with the Standard

Track performance over time and understand what impacted it

Implement best practices and policies to improve energy efficiency\*

Document decisions and communicate amongst stakeholders

Leave (organized) breadcrumbs for current and future staff and service providers

\*and if ESG (Environment, Social, Governance) or broader sustainability/RCM program, then water and waste, IEQ (indoor environmental quality), site conditions might be included as well

# Best practices and policies include:

---

Tenant Improvement, renovation review for energy impact

Asset management for energy efficiency  
(condition, age, access, replacement plan)

Preventative Maintenance of assets including building controls

Training and education

Include Cx and M&V in major upgrades

Simply keeping track of what has been done, and what can be done next on an ongoing basis

# Implementation Timeline

| <b>Building Size</b>  | <b>Benchmark Building</b> | <b>Have a complete Energy Management Plan and O&amp;M Program in place</b> | <b>Submit Compliance Report</b> |
|---|---------------------------|--|---------------------------------|
| <b>Tier 1</b>   |                           |  |                                 |
| <b>220,001+ gsf</b>   | Now                       | 1/1/2025   | 6/1/2026                        |
| <b>90,001 - 220,000 gsf</b>   | Now                       | 1/1/2026   | 6/1/2027                        |
| <b>50,001 - 90,000 gsf</b>  | Now                       | 1/1/2027   | 6/1/2028                        |
| <b>Tier 2</b>   |                           |  |                                 |
| <b>20,000 – 50,000 gsf and residential, and larger buildings with 20,000+ sf of conditioned space that are exempt from Tier 1</b> | Now                       | 1/1/2026   | 7/1/2027                        |

# Readiness Check:

---

Do we have and maintain a *validated* profile at ENERGY STAR Portfolio Manager? Do we know our Target EUI?

Do we have an inventory of all assets (including the envelope) and equipment that use energy (and optionally water) including age, service life, efficiency, and condition, and replacement plan?

Do we have a written Operation and Maintenance task list for these assets? Do we log those tasks as they are completed?

Do we have a training program for operators and maintenance techs, as well as guidance for occupants on energy efficient operations?

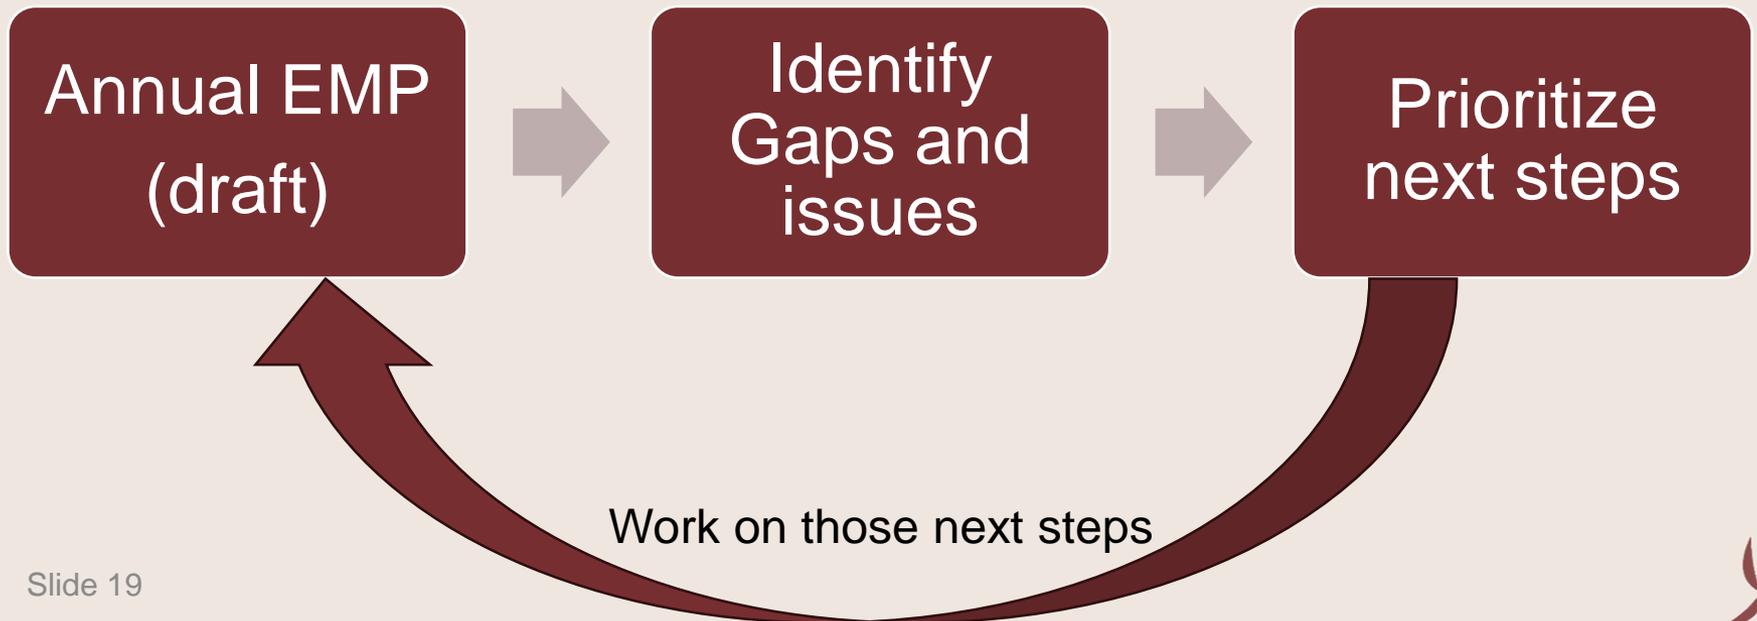

Do we have a protocol to review renovation plans for energy impact?

# EMP Iterative Development

---

- Start now and complete sections as you have them
- Build on what you already do
- Make a PDF for each year and update the Word file once or twice a year

## Keep your eye on the big picture

---

Are you meeting your target?

Are you documenting and sharing goals, new practices, and progress with stakeholders?

Do you have a way to manage assets and equipment for optimal performance and informed decision making?

# Questions?

---

# Introduction to ArchEcology's EMP template

Overview of Template package and how to use it

Discussion on specific content sections and implementation

CBPS EMP Template by ArchEcology

| Name   | Date modified     | Type                   |
|--|-------------------|------------------------|
| Audits and Assessments                               | 2/10/2023         | File folder            |
| Building and Use Records                             | 2/10/2023         | File folder            |
| Equipment  | 3/1/2024 4:22 PM  | File folder            |
| Improvement Projects                                 | 2/10/2023         | File folder            |
| O&M Program Records                                  | 3/1/2024 4:22 PM  | File folder            |

| CBPS Energy Management Plan Template 4.0Ex           | 2/12/2024         | File                   |
| EMP Template Instructions                            | 2/23/2024 5:19 PM | Adobe Acrobat Document |
| Intro to Washington Clean Building Compliance        | 2/1/2024 1:45 PM  | Adobe Acrobat Document |

O&M Inventory and Tasking Template from Avista

User-friendly Annex D checklists from ASHARE 100 User Guide

# Energy/Water Graphs

- You could grab screen shots from Portfolio Manager
- Degree Day data from degreedays.net
- We have been using the download link shown here for graphing data

Tip: This link gives monthly by fuel in kBtu

# EMP – O&M Plan/Program Interface

---

- Use the annual EMP to capture:

O&M Objectives  
(performance,  
condition)  
L2.2.1

Status of  
inventory/condition  
assessment  
L2.1, L2.2.2

Description of  
standard operating  
procedures

Status of  
implementing the full  
scope of the O&M  
Program

Key findings, issues  
each year and plan  
to resolve

Describe any  
changes and that  
corresponding  
updates/training etc  
were made

# Reporting Documentation

Compliance Path > Building Selection > Building Details > Form B - EUI > Form C - ESPM > Attachments > Notes > Contact Information > Form A - Submit

## 6. Attach Supporting Documentation

Attach all of the required forms identified below. Attachments should be submitted in a standard electronic file format including PDF, WORD, EXCEL, JPEG, and formatted appropriately to read. Scan

# Questions?

---

# O&M

---

- Start with inventory, including
  - Envelope components
  - DHW
  - HVAC
  - Refrigeration
  - Lighting
  - Controls
  - Electric distribution and onsite generation
- Reference the task lists in Annex D (see user friendly version in Appendix from User Guide)
- Field assessment of condition...integrate into PM tasks

# From latest update:

---

## **L2.2.5 Documentation.** {A *minimum inspection and maintenance documentation package shall consist of the following items:*

1. Listings of *building* systems and system components with associated performance criteria pertinent to the facility.
2. Inspection and maintenance tasks and the method of tracking (automated or manual).
3. Identify *building* systems or components operating beyond their *useful life*.
4. Sufficient record detail and verification (written or electronic) to demonstrate implementation of the maintenance plan.
5. The inspection and maintenance document directory shall provide easy access and be well organized and clearly identified. Emergency information shall be immediately available and shall include emergency staff and/or agency notification procedures.}

# Requirements specific to CBPS/ASHRAE 100

---

- Lighting Satisfaction Survey & Lighting Schedule and Calculated LPD
  - now only needed for Tier 1 who don't meet EUI and haven't done an upgrade in last 5 years
- 6.4.2 Safe and reasonable access:
  - Assess in field as part of developing Inventory with conditions – note that this has been verified or note issues and track like you would an EEM
- 6.4.3 Update O&M when building use changes or alterations made
- 6.5 Formal process to ensure tenant improvements do not change net energy use except unless consistent with change in target
